Requirements specifications

1. Can you understand what the requirements mean?

Yes, all Functional, Non-Functional, Software, Hardware requirements and interfaces related to their project are clearly stated. All are easily understandable.

2. Is each requirement stated clearly, concisely, and unambiguously?

Yes. All are clearly stated without any difficulty in understanding.

3. Do any requirements conflict with or duplicate other requirements?

No. I didn't find any duplicity in the whole deliverable.

4. Is each requirement uniquely identified?

Yes. Everything is written accordingly.

5. Are all requirements written at a consistent and appropriate level of detail?

Yes. All requirements are written concisely, and in a detailed manner. Easily understandable.

6. Are there areas not addressed in the document that need to be?

No. All the questions are answered properly.

7. Are non-functional requirements stated? Do you think any important non-functional requirements are not stated?

All are clearly stated. No more are needed.

8. Are interface requirements stated?

Yes, clearly stated and easily understandable.

9. Is any necessary information missing from a requirement? If so, is it identified as TBD?

No information is missing. All are clearly stated.

10. Is each requirement free from content and grammatical errors?

Yes. No content and grammatical errors.

11. Does the document include all of the known customer or system needs?

Yes. All are included clearly in the document. No extra including's are required.
